

INTERNATIONAL TIMBER ACADEMY 2020

LAB University of Applied Sciences in Finland is Scandinavia's leading university for Wood Technology studies. The university will arrange, together with the Association of Finnish Sawmillmen, a comprehensive Diploma course in Nordic Wood Industries during spring and summer of 2020.

COURSE PROGRAMME

February 2020: Forestry and environmental issues

March 2020: Sawmilling

April 2020: Panel products

May 2020: Global wood industry

30th July – 7th August: Finland

From February to May the lectures, exercises and tests will be conducted remotely over the internet. Finally in the last module the students will be visiting forest operation sites, sawmills, plywood mills, glulam factories etc.

COURSE REQUIREMENTS

Students are expected to have a minimum 2nd level qualification and some year's work experience from wood product related industries. Each module is 3 ECTS points. The number of students is restricted to 35, with maximum 3 from each country to make this an excellent opportunity to network with future decision makers.

The cost of the course is euro 1.000 per person, covering the study material and excursions, accommodation and most of the meals in Finland. Students cover their own travel to and from Finland.

Application time closes 15th December 2019. The application link is here

https://www.lyyti.in/INTERNATIONAL_TIMBER_ACADEMY_2020_0739

Applicants will receive further information by 31/12/2019.
